

# LOPPFRÖ PSYLLIUM SEED

**DIGESTION &  
GUT HEALTH**

General health

To assist the horse's  
gut in removing  
sand, soil, and gravel

## WHOLE PSYLLIUM SEEDS

### APPLICATION

To be used for horses that frequent sandy paddocks or may ingest sand, pine cones, soil, or gravel.

- 100% psyllium seeds (flea seeds)
- Reduces the risk of sand colic
- Forms a gel in the horse's stomach to expel sand and gravel

Eclipse Biofarmab Psyllium Seed contains 100% premium quality psyllium seeds, also called flea seeds.

When horses graze in paddocks with sparse or no grass, they may inadvertently ingest significant amounts of sand and gravel, leading to the accumulation of these materials in the gut and the potential development of sand colic. Some horses are prone to restlessness and may nibble on various objects within their reach, including cones and bark. To facilitate the removal of this undesirable material from the intestine, psyllium seeds can be administered.

The outer shell of the psyllium seed forms a gel-like substance upon contact with liquids, efficiently transporting sand and gravel out of the intestine. Psyllium (flea seed) has a long history of successful use in horses for this purpose.

Psyllium seed also has a positive impact on intestinal function by promoting regular intestinal motility.

Psyllium is best administered with wet food immediately following feeding. It can also be given in its dry form, but it is essential to ensure the horse has unrestricted access to water. The product should not be soaked, as the desired gel formation occurs inside the horse for optimal effectiveness.

As this product is composed of natural ingredients, variations in colour and appearance are normal.

### FEEDING DIRECTIONS

#### For maintenance:

4 scoops daily for up to 30 days

#### For therapeutic use:

12 scoops daily for up to 5 days

(only in consultation with the veterinarian)

1 scoop = 25 g

### SIZES AVAILABLE

0549 2.5 kg = 25 days supply at 100 g/day

0998 5 kg = 50 days supply at 100 g/day

0770 25 kg = 250 days supply at 100 g/day

### COMPOSITION

100% Psyllium Seed (Plantago ovata).

### ADDITIVES

The product contains no additives.

### ANALYTICAL CONSTITUENTS

Crude Ash 2.8%, Crude Protein 16.9%, Crude Fat and Crude Oil 6.1%, Crude Fibre 20%.

### SHELF LIFE

24 months.
